ACF release film
speed up the printing
and success rate

High printing speed
Max. 80mm/h

Wireless transmission
offline printing

Flash curing
Printing speed
is greatly improved

Bilinear slide rail
+ ball screw

Excellent material
compatibility

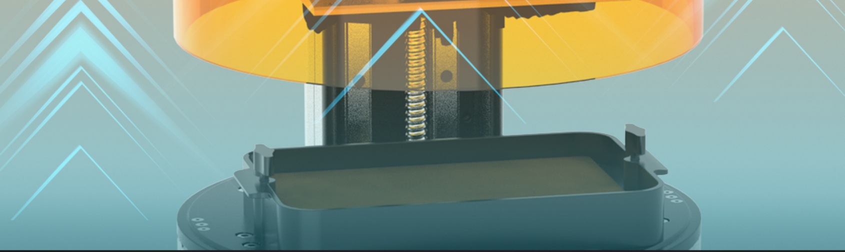
95% light uniformity

Fully meet all kinds of dental model printing, and can support small batch customized production.

All models are provided by PioNext Lab

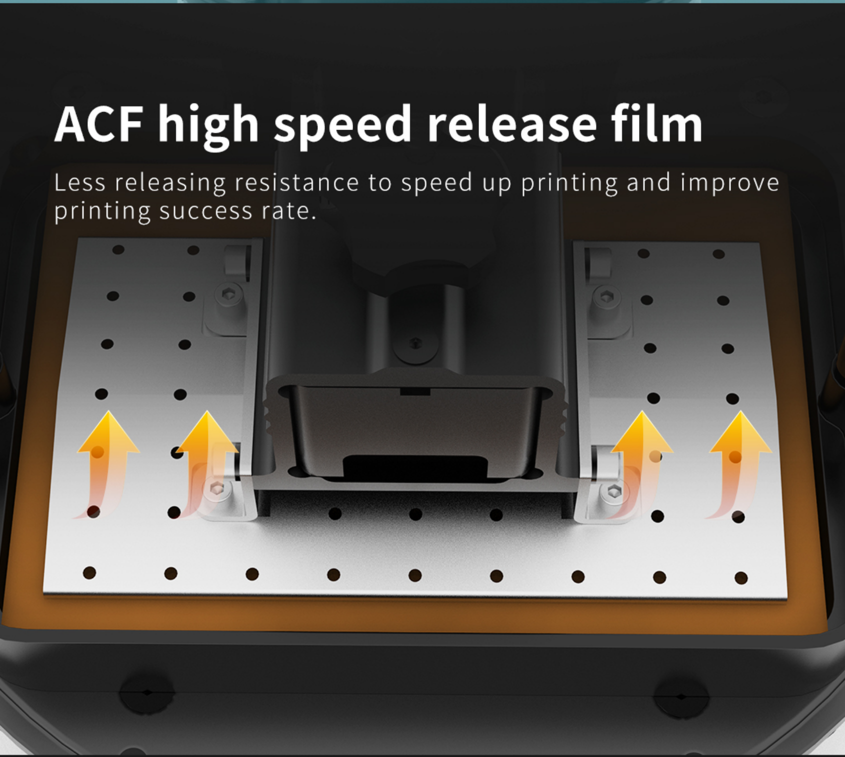
Automatically open acrylic cover

Automatically open the cover after printing
to free hands and prevent dirt.



ACF high speed release film

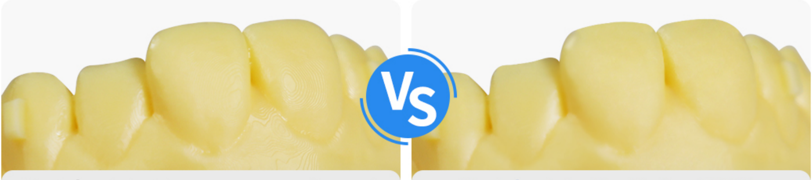
Less releasing resistance to speed up printing and improve printing success rate.



Capture data   Interior/lab design   PioNext 3D printing   To deliver

Free printed models available

CTo check and feel printing quality of PioNext printers by yourself. Free models available.

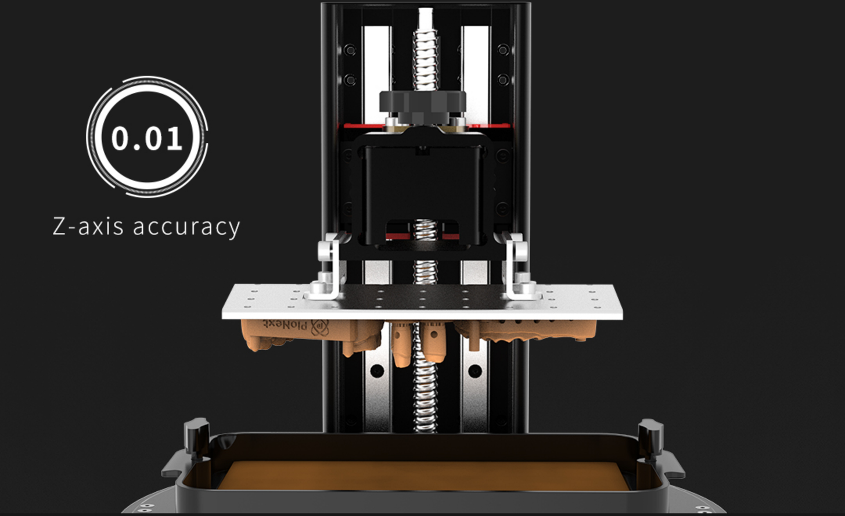


Model printed by common equipment

Model printed by PioNext D158

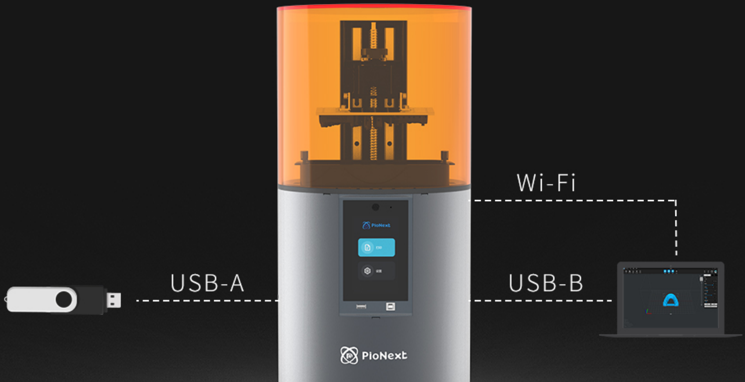
Stable Z-axis structure design

Dual linear guide rails and ball screws are applied on Z structure to provide more stable movement to print less layers and smoother surface models.



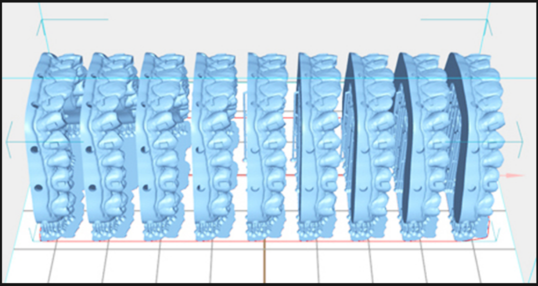
Wireless transmission
Offline printing

Printing files will be saved automatically in the machine by built-in memory of motherboard for next print.
WIFI connected for convenient printing; After the U disk selects the file to be printed, the U disk can be unplugged.



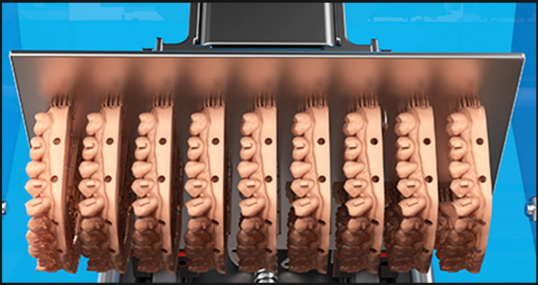
Easy to use

Printing process introduction



Step 1:

Model file slice



Step 2:

3D printing models

Step 3:

Cleaning and curing

Wide range of applications

Fully meet printing requirement of dental, jewelry , prototyping and others.

Product parameters

DLP 3D printer supported by Texas Instruments core technology.

Model:	D158
Print size:	158x89x100mm
Machine size:	280x280x587mm
Packing box specifications:	350x350x657mm
Pixel Dimensions:	0.061mm
Printing accuracy:	50µm
Maximum printing speed:	80mm/h
Print layer thickness:	0.025-0.1mm
Touchscreen:	5-inch color touch screen

Resolution:	2560*1440
Support consumables:	405nm dental, jewelry, washing and other photosensitive resin
Connection method:	USB/WIFI
Z axis type:	double linear guide + ball screw
Z-axis precision:	0.01mm
Rated power:	60W
Power cord standard:	National standard/American standard/European standard, etc.
Machine weight:	13KG
Gross weight of the machine:	15KG
Languages supported:	Support 13 languages, Chinese and English are preferred
